Release 18.10.2004

lego001

V/A – Reconstruct A

Release information

Starting point of the "Reconstruct A" was the reconstruction kit. Several months it was freely accessible on our server. Many loops, cuts and passages of the first two releases should give you free inspiration fundament for creative waveforming.

Outgoing the artists create in combination with new sounds unique tracks which save their own flavor but also communicate with eachother caused of the same roots. Our selection of the received works is freely downloadable.

We hope you will enjoy it!

Thanks to David Mascha for the Artwork. Visit http://www.davidmascha.tk
